

Multimedia Applications Processors – Low-Power, High-Performance, Arm9™ Core

i.MX21

Not Recommended for New Designs

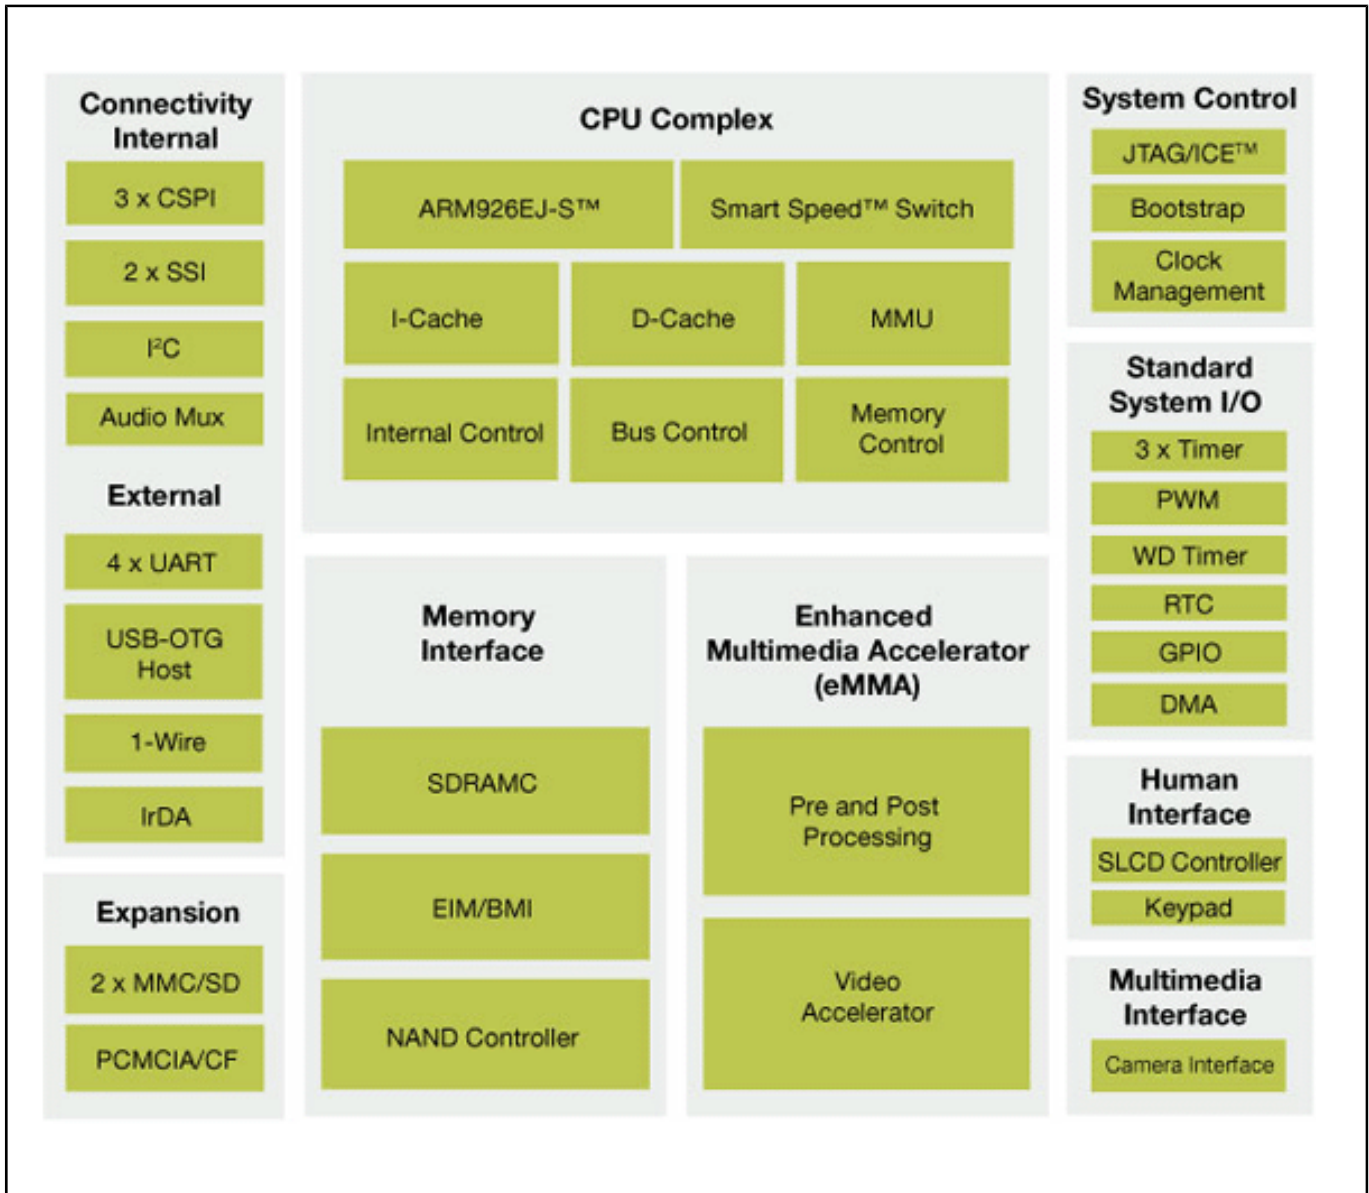

This page contains information on a product that is not recommended for new designs.

Last Updated: Apr 8, 2022

Our i.MX family of applications processors has demonstrated leadership in the portable handheld market. The i.MX21 multimedia applications processor is the latest addition to this family and builds on its low-power, high-performance heritage. NXP® has shipped more than 60 million chips of our industry-founding applications processors. That means you can start smart by picking products with a technology pedigree to handle all the creativity you can pump into them.

The i.MX21 features the advanced and power-efficient Arm926EJ-S™ core operating at speeds starting at 266 MHz and is part of a growing family of Smart Speed products that offer high performance processing optimized for lowest power consumption.
