

# Kinetis K21-120 MHz, Full-Speed USB, Anti-Tamper Microcontrollers based on Arm<sup>®</sup> Cortex<sup>®</sup>-M4

## K21\_120

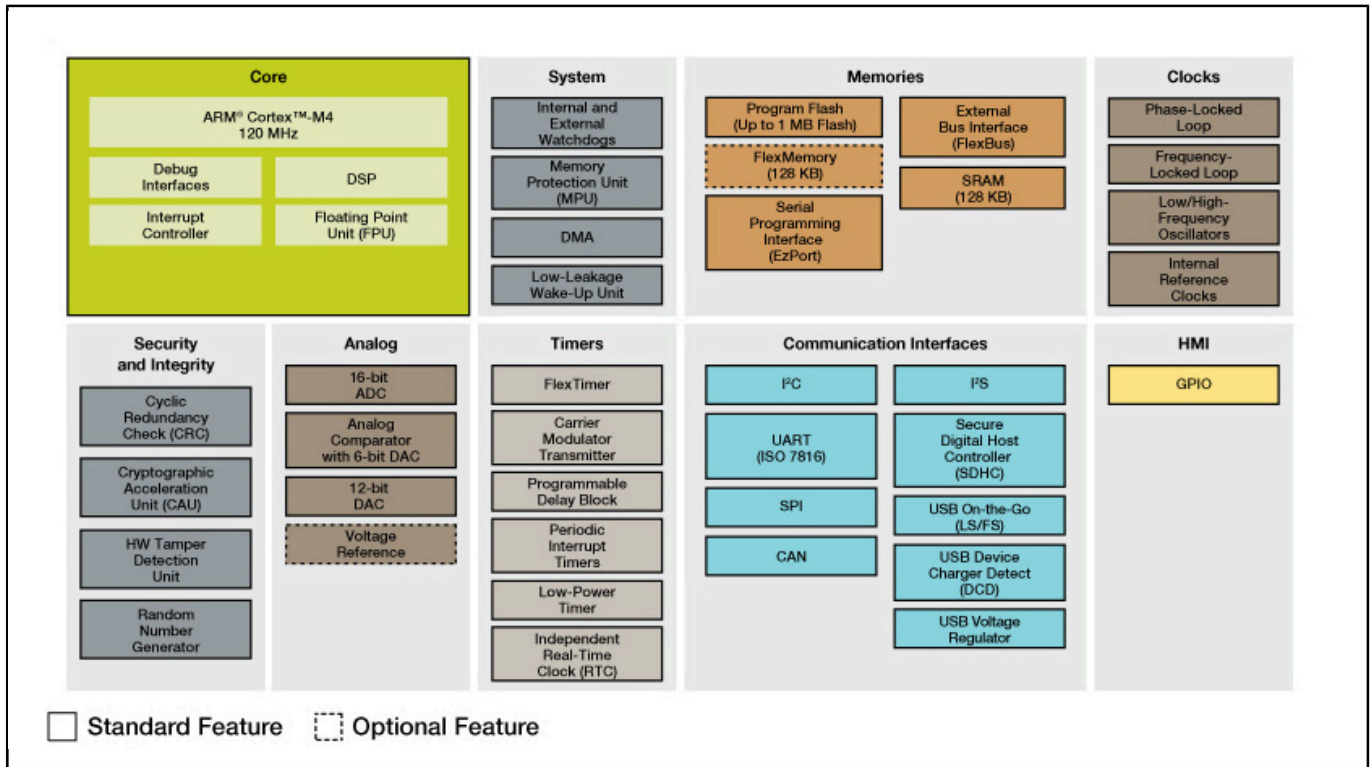

Last Updated: Jan 16, 2023

The Kinetis K21 120 MHz MCU family targets cost-sensitive applications requiring low-power functionality.

- Features hardware encryption and tamper detection
- Includes a rich suite of analog, communication, timing and control peripherals to accommodate a wide range of requirements
- Maximizes board space and enhances performance with minimum-length interconnections
- Provides performance efficiency with low power
- Delivers significant BOM savings through smart on-chip integration
- Shares the comprehensive enablement and scalability of the Kinetis portfolio

Please contact your local NXP representative to download the K21 Security Data sheet and Reference Manual documents (under NDA).
