Last Updated: Sep 7, 2022

The MMA1254 series of silicon capacitive, micro-machined accelerometer features signal conditioning, two-pole low-pass filter, and temperature compensation.

- Targets industrial applications such as vibration recording, mechanical bearing monitoring, hard drive protection, mouse/joysticks, virtual reality input, and sport diagnostics
- Includes factory-set zero-g offset full-scale span and filter cut-off; requires no external devices
- Verifies system functionality via full-system self-test capability
