

# Bootable CPU RTC with Two I<sup>2</sup>C Buses, 128 Byte SRAM and Alarm Function

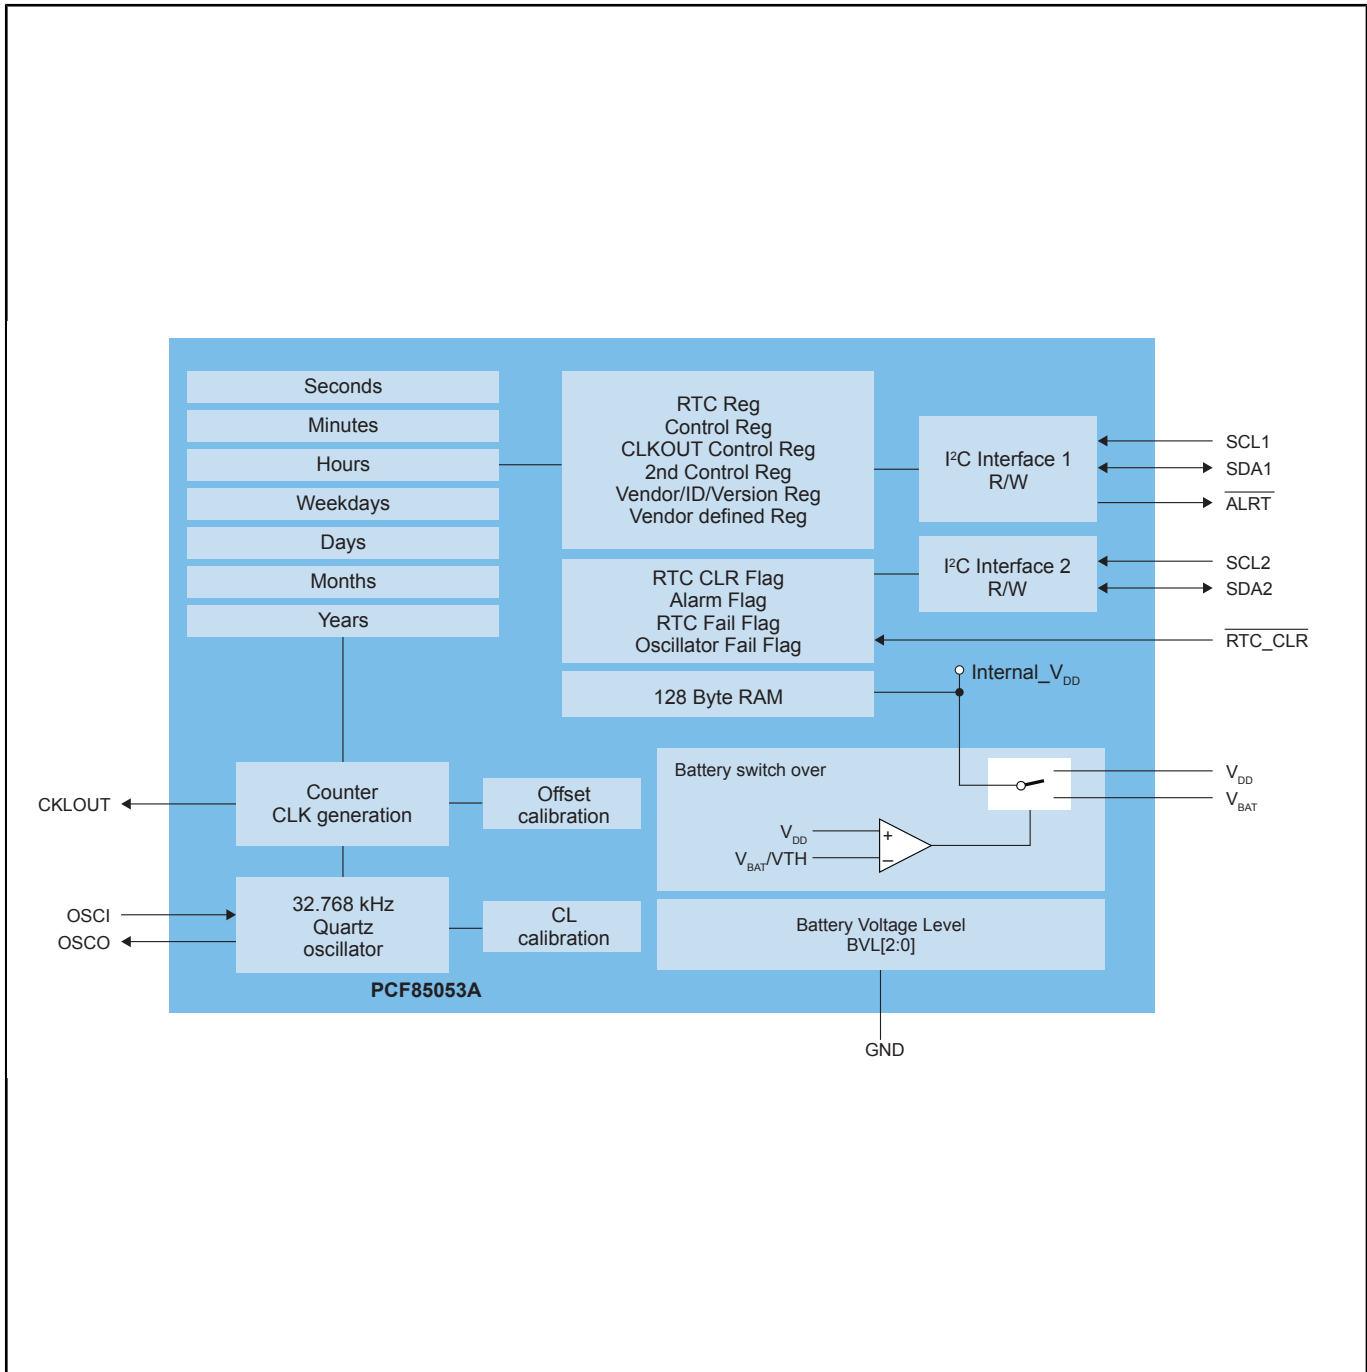

## PCF85053A

Last Updated: Apr 12, 2024

PCF85053A is a CMOS real-time clock (RTC) and calendar, optimized for low power consumption and automatic switching to battery on primary power loss. Featuring clock output, alert interrupt output and 128-byte battery backed-up SRAM, the PCF85053A includes two I<sup>2</sup>C buses. The primary I<sup>2</sup>C bus has the read / write capability on RTC and SRAM registers; the second I<sup>2</sup>C bus also can read / write most registers with the control bits set by primary I<sup>2</sup>C controller.

PCF85053A offers clock output calibration-related registers such as crystal capacitive load (CL) configuration and offset register setting.
