

3 Phase Inverter Reference Design Using the GD3162 with HybridPACK Drive

RDGD3162I3PH5EVB

Last Updated: Oct 30, 2023

RDGD3162I3PH5EVB is a three-phase inverter reference design and evaluation board populated with six GD3162 single channel IGBT/SiC MOSFET gate drive devices. The evaluation board is designed to connect to a compatible HybridPACK drive IGBT or SiC module for full three-phase inverter applications development and testing. Included with board is KITGD316xTREVB MCU/translator for communication and testing using Flex GUI software.
