

VortiQa Software for Small Business Gateways

SME

Last Updated: Apr 10, 2022

VortiQa® software for small business gateways is a production-ready security and convergence solution specifically tailored for small and branch office gateways. This software product line offers a high-performance, feature-rich security product and yet provides simplified management interfaces. It supports load-balancing and fail-over via separate WAN connections. The software architecture is performance-tuned for PowerQUICC® and QorlQ® processors.

VortiQa software for small business gateways is pre-integrated with PowerQUICC and QorlQ single- and multicore processor solutions such as the MPC8377 and the QorlQ P2020 processors. The software leverages special hardware capabilities of the PowerQUICC and QorlQ platforms such as security engine for IPSec and IKE encryption and decryption.
