

Software Technologies from NXP® Professional Services

OVERVIEW

The NXP Professional Engineering Services team has production-proven experience in complex, fast moving markets and delivering specific software technologies—from audio switches to in-vehicle infotainment (IVI) units. We are experts in the specific technologies and the processors they are being developed upon. The software technologies we provide are complex solutions that typically require custom integration with the operating system, applications and low-level system drivers.

WHY CHOOSE NXP PROFESSIONAL SERVICES?

NXP Professional Services helps customers drive innovation while minimizing risk. This dedicated group of engineers offers a unique mix of experience, skills and resources to directly address key development challenges and ensure success. We've been successfully providing comprehensive software development services for embedded systems for over 15 years.

- ▶ Trusted embedded expertise with extensive low-level software design knowledge
- ▶ Technical competency in targeted software technologies and operating systems on NXP microprocessors
- ▶ Experts in enabling unique system features like secure-boot and Trusted Execution Environment (TEE)
- ▶ Scalable development—from single driver development to complete platform integration

FEATURES

- ▶ Dedicated project management
- ▶ Extended development capabilities and skills
- ▶ Reduced time-to-market
- ▶ Trusted global partner vested in your success

NXP Professional Services works within a structured methodology that ensures your project is completed on time and within budget with the quality you've come to expect from the NXP Professional Engineering Services team. Project execution involves a set of management and development processes based on industry standards.

BUSINESS MODEL

Engaging the NXP Professional Services team or obtaining our software technologies follows a simple engagement model. Our experts are available to discuss your system needs and get your development started. We also have flexible licensing options to help balance your production and development costs.

For more information and to see a comprehensive list of our software technologies, please visit www.nxp.com/ProServices.
